WD Activity Based Learning

Case Study-1

ShopEasy Online Store – HTML and CSS Project

1. Introduction

ShopEasy is a simple and attractive online shopping website developed using HTML and CSS. It allows users to view different products such as headphones, smart watches, sports shoes, and handbags.

The website displays product images, product descriptions, ratings, prices, discounts, and special offers. It also includes a navigation bar, search box, shopping banner, and Add to Cart buttons.

Main Objective: To design a user-friendly and responsive online shopping website using HTML and CSS.

2. Explanation of the Code

The ShopEasy website contains the following sections:

1. Header: Displays the ShopEasy website name and a search box to search for products.
2. Navigation Bar: Contains Home, Products, Fashion, and Offers links to navigate between website sections.
3. Banner Section: Displays the Big Shopping Sale message with a 50% discount and Shop Now button.
4. Featured Products: Displays four products with images, names, descriptions, ratings, prices, and discounts.
5. Add to Cart Button: Provides a button for adding products to the cart. (The button is for design only; JavaScript is needed to make it functional.)
6. Special Offers: Displays an extra 10% discount on the next shopping order.
7. Footer: Displays the copyright information and a Happy Shopping message.

CSS Explanation

- Universal Selector (*): Removes default margin and padding.
- Body: Sets the background colour and text colour.
- Header: Uses Flexbox to arrange the website title and search box.
- Navigation: Adds background colour and hover effects to menu links.
- Banner: Uses a gradient background and styles the sale message.
- Grid: Arranges products in responsive columns.
- Card: Creates product boxes with shadows and rounded corners.

- Hover Effects: Adds animation when the mouse moves over product cards and buttons.
- Media Query: Adjusts the website layout for mobile screens.

3. HTML Code

Create a file named task1.html.

```
<!DOCTYPE html>
<html>
<head>
  <title>ShopEasy Online Store</title>
  <link rel="stylesheet" href="task1.css">
</head>
<body>

<header>
  <h1>ShopEasy 🛍️</h1>
  <input type="text" placeholder="Search products...">
</header>

<nav>
  <a href="#home">Home</a>
  <a href="#products">Products</a>
  <a href="#fashion">Fashion</a>
  <a href="#offers">Offers</a>
</nav>

<section class="banner" id="home">
  <h2>Big Shopping Sale!</h2>
  <p>Get up to 50% OFF on selected products</p>
  <a href="#products" class="btn">Shop Now</a>
</section>
```

```
<section id="products">
  <h2>Featured Products</h2>

  <div class="grid">

    <div class="card">

    nav a {
        display: inline-block;
        margin: 8px;
    }
}
```

5.Output

6. Conclusion

The ShopEasy Online Store project demonstrates how HTML and CSS are used to create an attractive online shopping website. HTML provides the basic structure, while CSS improves the appearance using colours, layouts, shadows, animations, and hover effects.

This project helps students understand website design, product cards, navigation links, CSS Grid, Flexbox, and responsive web design. It provides a basic idea of how real-world e-commerce websites are developed.

Project Completed

Case Study-2

ShopEasy Online Store – HTML and CSS Project

1. Introduction

ShopEasy is a simple and attractive online shopping website developed using HTML and CSS. It allows users to view different products such as headphones, smart watches, sports shoes, and handbags.

The website displays product images, product descriptions, ratings, prices, discounts, and special offers. It also includes a navigation bar, search box, shopping banner, and Add to Cart buttons.

Main Objective: To design a user-friendly and responsive online shopping website using HTML and CSS.

2. Explanation of the Code

The ShopEasy website contains the following sections:

1. Header: Displays the ShopEasy website name and a search box to search for products.
2. Navigation Bar: Contains Home, Products, Fashion, and Offers links to navigate between website sections.
3. Banner Section: Displays the Big Shopping Sale message with a 50% discount and Shop Now button.
4. Featured Products: Displays four products with images, names, descriptions, ratings, prices, and discounts.
5. Add to Cart Button: Provides a button for adding products to the cart. (The button is for design only; JavaScript is needed to make it functional.)
6. Special Offers: Displays an extra 10% discount on the next shopping order.
7. Footer: Displays the copyright information and a Happy Shopping message.

CSS Explanation

- Universal Selector (*): Removes default margin and padding.
- Body: Sets the background colour and text colour.
- Header: Uses Flexbox to arrange the website title and search box.
- Navigation: Adds background colour and hover effects to menu links.
- Banner: Uses a gradient background and styles the sale message.
- Grid: Arranges products in responsive columns.
- Card: Creates product boxes with shadows and rounded corners.
- Hover Effects: Adds animation when the mouse moves over product cards and buttons.
- Media Query: Adjusts the website layout for mobile screens.

3. HTML Code

Create a file named task1.html.

```
<!DOCTYPE html>

Sure! Mee ShopEasy Online Store project ki assignment lo rayadaniki suitable ga simple English lo Introduction, Explanation, HTML Code, CSS Code, Conclusion istunnanu.

ShopEasy Online Store – Web Development Project

1. Introduction

ShopEasy is an online shopping website developed using HTML and CSS. It is designed to help users view different products such as headphones, smart watches, sports shoes, and handbags.

The website displays product images, descriptions, ratings, prices, and discounts. It also includes a search bar, navigation menu, shopping offers, and Add to Cart buttons.

Objective: To create an attractive, user-friendly, and responsive online shopping website using HTML and CSS.

2. Explanation

The ShopEasy website consists of the following sections:

1. Header: Displays the website name ShopEasy and a search bar.
2. Navigation Bar: Contains Home, Products, Fashion, and Offers links.
3. Banner Section: Displays the shopping sale announcement and 50% discount message.
4. Featured Products: Displays four products with images, names, descriptions, ratings, and prices.
5. Add to Cart: Provides buttons for adding products to the shopping cart. These buttons are for display only.
6. Special Offers: Displays an additional 10% discount on the next shopping order.
7. Footer: Displays copyright information and a Happy Shopping message.

CSS Explanation:

- Universal selector resets margin and padding.
- Background properties add colours to different sections.
- Flexbox arranges header elements.
- CSS Grid displays products in columns.
- Border-radius creates rounded corners.
- Box-shadow adds shadow effects to product cards.
- Hover effects make buttons and product cards interactive.
- Media queries make the website responsive on mobile screens.

6. Conclusion

The ShopEasy Online Store project helps us understand how to develop an online shopping website using HTML and CSS. HTML is used to create the structure of the website, while CSS is used to improve its design and appearance.

This project provides practical knowledge of navigation bars, product cards, images, CSS Grid, Flexbox, hover effects, and responsive web design. It also helps students improve their basic web development skills.

Case Study-3

Healthy Life – Healthy Food and Nutrition Website

1. Introduction

Healthy Life is a simple and attractive website developed using HTML and CSS. The main purpose of this website is to provide information about healthy food, nutritious recipes, daily meal plans, and healthy eating habits.

The website displays different healthy food recipes with images, ingredients, and calorie information. It also provides a daily meal plan and useful health tips to encourage people to follow a healthy lifestyle.

Objective: To design a user-friendly and responsive Healthy Food and Nutrition website using HTML and CSS.

2. Explanation

The Healthy Life website consists of the following sections:

1. Header: Displays the website name "Healthy Life" with a tagline "Eat Healthy, Live Happy!"
2. Navigation Bar: Contains Home, Recipes, Meal Plans, and Health Tips links to navigate between different sections.
3. Banner Section: Displays the message "Choose Healthy Food" with an Explore Recipes button.
4. Healthy Recipes: Displays three healthy food items with images, ingredients, and calorie information.
    - Fresh Salad – 180 kcal.
    - Healthy Breakfast – 300 kcal.
    - Vegetable Soup – 150 kcal.
5. Daily Meal Plan: Provides a simple daily food schedule for breakfast, lunch, snacks, and dinner.
6. Healthy Eating Tips: Displays useful tips such as eating fresh fruits, drinking enough water, reducing sugar and salt, and eating balanced food.
7. Footer: Displays copyright information and the message "Eat Well, Live Well!"

CSS Explanation:

- Universal Selector (*): Removes default margin and padding.
- Body: Sets the background colour and font style.
- Header: Styles the website title and tagline.
- Navigation: Creates a menu with links and hover effects.
- Banner: Adds an attractive background and styles the main heading.
- Grid: Arranges healthy food recipes in multiple columns.
- Card: Creates attractive recipe boxes with images and shadows.
- Hover Effects: Adds animation when the mouse moves over recipe cards.
- Media Queries: Help the website adjust to different screen sizes.

The CSS code was not included in your message. Below is a matching CSS code for your HTML website.

```
* {
    margin: 0;
    padding: 0;
    box-sizing: border-box;
    font-family: Arial, sans-serif;
    scroll-behavior: smooth;
}

body {
    background: #f1f8f3;
    color: #333;
}
```

```
header {
    background: #166534;
    color: white;
    text-align: center;
    padding: 25px;
}

header h1 {
    margin-bottom: 10px;
}

nav {
    background: #22c55e;
    padding: 15px;
    text-align: center;
}

nav a {
    color: white;
    text-decoration: none;
    margin: 15px;
    font-weight: bold;
}

nav a:hover {
    color: #ffff00;
}

.banner {
    background: linear-gradient(120deg, #86efac, #bef264);
```

```
    text-align: center;
    padding: 55px 15px;
    color: #14532d;
}

.banner h2 {
    font-size: 32px;
    margin-bottom: 12px;
}

.btn {
    display: inline-block;
    background: #166534;
    color: white;
    padding: 12px 22px;
    margin-top: 18px;
    text-decoration: none;
    border-radius: 25px;
}

section {
    padding: 35px 20px;
    text-align: center;
}

section h2 {
    margin-bottom: 25px;
    color: #166534;
}

.grid {
```

```
    display: grid;
    grid-template-columns: repeat(auto-fit, minmax(230px, 1fr));
    gap: 25px;
    max-width: 1000px;
    margin: auto;
}

.card {
    background: white;
